

Improve decision making and control with enterprise-wide reporting powered by PAR EverServ® Operations Reporting solution.

Whether you are the owner/operator of a single unit or a manager responsible for thousands of sites, understanding current restaurant performance is critical to ongoing business success. EverServ Operations Reporting is a PAR-hosted, Software-as-a-Service (SaaS) Web-based enterprise reporting service that consolidates data from all your restaurants and posts it to a secure Web portal. Designed for corporate, field, and site managers, Operations Reporting provides visibility into every store and is an indispensable decision-making tool. Accessing an executive dashboard, you get clear visibility of financials, sales analysis, marketing, inventory, and workforce.

Supporting PAR EverServ QSR and PAR EverServ Heritage POS applications, Operations Reporting provides actionable information that can be used to make better informed business decisions and quick alerts to managers for problems that arise at various locations for immediate action. The solution's executive dashboard gives users at-a-glance visibility to key performance metrics. Integrate Operations Reporting to your existing business applications such as financials, payroll, and supply-chain systems to create a custom business system to meet the needs of your unique operations.

For actionable information you need to better manage your operations—when and where you need it—select PAR EverServ Operations Reporting.

Benefits

Improved Visibility of Operations – Operations Reporting's executive dashboard enables you to see a snapshot of your entire enterprise performance or drill down on regions or individual store operations.

Improved Decision Making – Visibility to actionable information on the operations of remote sites enables you to react quickly and make better decisions.

Accessible Anywhere – Hosted on a Web portal, your operations' reports can be accessed anywhere you have a device with Web browser capabilities.

Easy Integration – Integrates easily with other business applications (financials, payroll and supply chain) and Microsoft products such as Excel.

Accommodates Future Growth – Built on a service-oriented architecture Operations Reporting has the flexibility and scalability to grow with your operations.
